Milk Farm Software Announces The Launch of The Renewed Web-Site

Soft colors, powerful hosting

Saint-Petersburg, Russia. — August 12, 2007 — Milk Farm Software today announced the launch of the renewed site: www.milkfarmsoft.com has brand-new look and a solid back-end.

Milk Farm Software is now presented by the website redesigned from scratch. Visually it is composed using soft colors and soft corners. Site structure was optimized to allow faster access to the relevant information and provide means for future extensibility.

Milk Farm Software is proud to announce, that www.milkfarmsoft.com is powered by [TextDrive™ hosting](#) now. It is ready to serve pages and files to our customers faster and more reliable than ever before.

About Milk Farm Software, Ltd.

Milk Farm Software, Ltd. was founded in 2004 by Andrey Belov and Alexey Zakhlestin. The company develops best of class innovative software for Macintosh. Our team consists of skillfull artists and programmers with strong experience in different kinds of technology including, but not limited to, TCP/IP networking, CORBA®, Cocoa™, Zeroconf (Bonjour™), and XML-RPC.

Milk Farm Software's mission is to create deeply functional and easy to use software, which conforms to international standards. We believe that core technologies should be open-source and contribute parts of our work to the community under BSD-style licence.
